

ROCKET BALLOON

SUMMARY

Kids blow up balloons and try to fly the balloons into a target

SUPPLIES

- Several Balloons, one for each individual player
- Hula hoops, baskets or other objects to represent start and finish lines
- 2-minute timer

SET UP

- Pick 5 astronauts from each team and establish a starting line.
- Place a hula hoop on the opposite side of the room and tell them it is the moon.
- Give each astronaut their own balloon (rocket-ship)

GAMEPLAY

1. When timer begins, the astronauts may begin blowing up their balloons.
 - a. NOTE: the contestants are allowed to help each other blow up their balloons if needed – ideally if a smaller player cannot blow up their balloon, they should ask for help **BEFORE** slobbering all over it or else no one will want to help them.
2. The first astronaut in line will blow up his or her balloon and let it go toward their target, the moon.
3. Once the rocket-ship lands, the next person in line will run to where it landed and let their balloon go.
4. The next person in line will then go to where the last rocket-ship landed and blow theirs up and let it go.
5. This will go on until time runs out or until one astronaut team reaches the moon!
6. If time runs out no one has gotten their balloon through the hoop, the closet team wins.
