

HOLE IN ONE

SUMMARY

Kids see how many ping pong balls they can get in a tube within 1 minute. Expect the last 10 seconds to be INTENSE! This game requires you to buy some extra supplies but this game is worth it.

SUPPLIES

- A lot of ping-pong balls. You can buy these in bulk online. They don't need to be high quality.
- Bucket for ping-pong balls
- 2 clear tennis ball cans
- Masking tape
- 1 minute timer

SET UP

- Tape off a line for the kids holding the tennis ball cans (catchers) to stay behind.
- Tape off a line for the kids throwing ping-pong balls to stay behind. This line should be roughly 10 ft from the first line.
- Place the bucket of ping-pong balls where the throwers will stand.
- Place the clear tennis ball cans where the catchers will stand.
- Pick 2 kids from each team.
- Each team has 1 thrower and 1 catcher.

GAMEPLAY

1. When the timer starts the throwers try to toss the ping pong balls into the cans. The catchers try to catch the Ping-Pong balls in their can without touching the ping-pong balls with their body.
2. At the end of the timer the team with the most balls in their can wins!

SUGGESTIONS

- As the kids miss catching ping-pong balls they will inevitably roll towards the spectators. This will lead to the spectators joining the game illegally. Make sure they know that if a spectator touches a ping-pong ball while the timer is playing their team will lose a ping-pong ball out of their can before we count to see who won.
